

A photograph of a wooden sauna interior with two levels of benches. A Harvia KIP electric heater is mounted on the wall between the benches. The heater is black with a chrome top section. The top section is open, revealing a large space filled with dark, smooth stones. The Harvia logo is visible on the front of the heater. The sauna walls and benches are made of light-colored wood. A blue towel is draped over one of the benches in the foreground.

HARVIA KIP

Traditional and trusted heater

Harvia KIP is a traditional wall-mounted heater that can be controlled with a built-in control panel or by a separate control unit depending on the model. In Harvia KIP heater the price and quality meet each other bathers' needs favorably.

The large stone space provides optimal heat release. The outer casing temperature of the heater stays low. The operating switches are placed in the bottom of the heater, and their location can be changed on the stage to the left or right side or front of the heater – this is a useful choice for the possibility, for example, wall cavity installation.

Harvia KIP is one of our most popular electric heater worldwide. Harvia KIP heater comes in black and chrome. Design is a clear and proven in thousands of saunas.

KIP45/KIP60/KIP80/KIP90 manual control

- Classic and reliable wall-mounted electric heater
- The heater features an integrated mechanical timer and temperature switch
- The location of the operating switches can be changed during installation
- The timer has a preselection time that allows you to select the start time (max. operating time 4 h)
- Material
 - Steel: stainless steel
 - Black: galvanized steel (upper part)/stainless steel (lower part)

KIP

MANUAL

KIP45E/KIP60E/KIP80E/KIP90E separate control unit

- Classic and reliable wall-mounted electric heater
- Controlled by a separate Harvia control unit (such as C150VKK, C170VKK, CF110, CF170, CX110 or CX170)
- Material
 - Steel: stainless steel
 - Black: galvanized steel (upper part)/stainless steel (lower part)
